

About Copper Ionization

Without sanitation, algae, viruses, fungi, and other micro-organisms can infest the average pool in less than one hour!

The biocidal effect of copper ions stems from a combination of mechanisms. These positively charged metal ions attach to the negatively charged bacteria cell membrane and cause quick death.

Harmless positively charged copper ions remain in the water, unaffected by sunlight, protecting your health.

Our water treatment and water filtration services will improve the taste of your water, protect your plumbing and laundry, and shield your family from chemicals and pathogens.

About the Manufacturer

Intec is the oldest company manufacturing copper ionization systems. They manufacture six different systems for pools, homes, agriculture and livestock, commerce and industry.

Intec is the nation's largest private well specialist and has been providing ionized pools for thirty years. They were the first company to utilize Copper Ionization, a natural process that is actually healthy for the body and cost-effective.

How Pure is Your Pool Water?

Discover the only way to have healthy water in your pool or spa!

Developed by NASA, copper ionization is the least expensive of all disinfecting methods and the only method that produces healthy pool water. It is the easiest of all disinfecting methods to maintain and monitor.

BENEFITS

1. **Non-Toxic.** No poison.
2. **Saves your eyes, nose and lungs.** Does not burn eyes. No odors. Does not cause asthma.
3. **Saves your skin.** No need to handle, store or swim in toxic chemicals.
4. **Healthy.** No cancerous byproducts.
5. **Environmentally friendly.** Harmless to lawns, plants and pets.
6. **Saves money.** Reduce water care costs by 80%. No more chlorine, stabilizer, algaecides, or shock treatments.
7. **Saves time.** Reduce water care time by 80%.
8. **Saves the pool.** Greatly extends life of paint, vinyl, coping, and plaster.
9. **Non-Corrosive.** Will not bleach, rust or corrode pool parts.
10. **Long lasting.** Ions do not evaporate and are unaffected by sunlight.

This system will spoil you for any other kind of pool. You will not think of chlorine the same way again.

You will LOVE the way it makes you feel!

For outdoor pools and spas
up to 60,000 gallons

Water Magic III \$ 1,495
For large outdoor pools
up to 120,000 gallons

CONCERNS WITH CHLORINE

- Chlorine is known to cause cancer, asthma, heart disease, arteriosclerosis, and premature aging.
- Chlorine combines with other chemicals in the water which can be carcinogenic.
- If chlorine were a new product proposed for pool water sanitation today, it would never be approved.

MAINTENANCE AND PARTS

Replacement Electrode \$ 130
Replace every 3 to 5 years.

Replacement Bars \$ 110
Replace annually.

Copper test kit \$ 26.50

The complete system comes with the “Water Doctor” control unit, copper electrode, and comprehensive test kit, and copper test kit.
